Summary

Backend Engineer with 5+ years of software engineering experience, specializing in Golang and distributed systems. Experienced in building scalable microservices, real-time systems, and data-intensive services serving 20M+ monthly users. Strong background in system performance, concurrency, caching, messaging, Kubernetes, and cloud-native architecture.

Experience

PT. MNC OTT Network (Vision+)

Jakarta

Backend Engineer

Feb 2024 - Present

Vision+ Short — Content Discovery & Recommendation

- Owned backend development for Vision+ Short's content discovery and recommendation pipeline, serving 3M+ users.
- Integrated Recombee for personalized FYP and content feeds, processing 2K+ user events/day.
- Reduced Recombee API latency by 72% by implementing reusable HTTP connections and eliminating repeated TCP/TLS handshakes.
- Built ClickHouse analytics pipelines processing 80M+ engagement events for content ranking, personalization, and editorial insights.
- Designed content classification and clustering systems organizing 25K+ content items across 300+ genres.

Vision+ Core Platform

- Led development of the Player Service supporting 20M+ monthly active users using Golang and Kubernetes.
- Built a real-time Smart TV pairing system serving 250K+ users, achieving 99% pairing success with 0.3s average pairing time.
- Developed content processing and delivery pipelines using AWS MediaConvert, MediaPackage, and S3.
- Built custom KrakenD middleware for rate limiting, JWT authentication, CAPTCHA, and CSRF protection, reducing abusive/bot traffic by 98%.
- Optimized backend performance using Redis, RabbitMQ, and Golang concurrency, achieving 3K+ req/s during peak traffic.
- Operated 4+ microservices on Kubernetes with OpenTelemetry-based observability.

PT Super Multi Bisnis Internasional

Jakarta

Lead Backend Developer (Freelance/Part-Time)

Jun 2025 - Nov 2025

- Led architecture and end-to-end backend delivery of 16 microservices for a Gojek-like on-demand platform within 6 months.
- Designed standardized service architecture, boilerplates, and internal SDKs adopted across the platform.
- Architected core services including driver matching, search, promotion, notification, and payment.

- Built geospatial driver-order matching using Elasticsearch, Google Maps API, and RabbitMQ, plus real-time communication using WebSockets, TURN, and NATS.
- Managed Kubernetes infrastructure and CI/CD using Docker, Helm, Jenkins, and ArgoCD.

DPMPTSP DKI Jakarta

Jakarta

Backend Engineer

Okt 2022 - Feb 2024

- Developed and maintained scalable RESTful APIs in Golang for GIS-based government applications.
- Integrated GeoServer services and improved API performance using Redis in-memory caching.
- Built and deployed containerized backend services using Docker and Kubernetes.
- Designed and implemented a dynamic Form Builder API using Golang and MongoDB.

Full Stack Engineer

Nov 2021 - Okt 2022

- Built GIS-enabled web applications integrating Golang APIs, GeoServer, and Mapbox.
- Implemented real-time features using WebSockets for instant in-app communication.
- Optimized map rendering by converting GeoJSON to vector tiles using Protobuf.
- Designed and optimized spatial queries using PostGIS and PostgreSQL.

PT Nerdvana Solusi Teknologi

Jakarta

Backend Engineer (Freelance/Part-Time)

Nov 2022 - Aug 2026

- Developed Golang-based APIs supporting internal banking applications with secure role-based access control (RBAC).
- Built and deployed containerized microservices on an on-premises Kubernetes cluster.
- Implemented gRPC for service-to-service communication across microservices.
- Designed and optimized PostgreSQL transactional queries for consistency and performance under load.

PT AUTOMATA INFO NUSANTARA

Bekasi, West Java

Web Developer

Jun 2021 - Aug 2021

- Developed an internal business and asset management web application for operational tracking and reporting.
- Built and deployed a full-stack application using PHP, JavaScript, HTML, and CSS.
- Implemented CI/CD pipelines with GitHub Actions for automated build and deployment.

Education

STT TERPADU NURUL FIKRI

Depok, West Java

Bachelor Degree, Informatics

2025

SMK INSAN KREATIF

Bogor, West Java

Vocational School, Computer and Network Engineering

2020

Skills

- **Languages & Backend:** Go, Python, PHP, JavaScript, gRPC, Microservices, WebSockets
- **Data :** PostgreSQL, PostGIS, MongoDB, ClickHouse, Elasticsearch, Redis, RabbitMQ, NATS
- **Infrastructure:** Kubernetes, Docker, AWS, KrakenD, Nginx, OpenTelemetry, Grafana
